Software Development Engineer in Test (SDET) with 15 years of experience in QA and test automation.
Seeking a challenging SDET/QA role, I am specially interested in early-stage companies and environments or projects where I can build the quality strategy.

EXPERIENCE

Between Technology   **11/2024 - 05/2025**
Senior SDET I joined a team for six months specifically dedicated to one of the company's largest clients to automate the regression test suite of a project with several years of development history. I built the entire automation project from scratch using Playwright, setting up the pipeline to run the tests on demand and also nightly.

Combination A/B   **06/2022 - 11/2024**
Senior SDET in a games studio developing custom components and product for the online gambling industry
- **Led test automation efforts for a legacy project lacking any testing**; worked on stabilizing and adding minimum coverage while promoting best practices.
- Developed and maintained automated test frameworks using **Cucumber, Playwright, NUnit**, covering from unit to e2e layers.

Alten Spain   **2021-2022**
Senior SDET embedded in a client from the insurance industry
- Implemented **testing for a business intelligence tool** in charge of data ingestion, data pipelines, dataset transformation and visualization, through a **Python/PowerBI solution**. I tested the **Azure** data pipelines through custom scripts and the business logic with **Cucumber**.
- Assisted in production releases to perform smoke testing and troubleshooting.

Cotecna   **2020-2021**
Senior QA Engineer for a leading testing & certification company
- Introduced a **holistic approach to quality**, implementing practices such as 3 amigos meeting and being actively involved in refinement sessions.
- Designed and facilitated **testing workshops** for other QA peers in a number of topics, i.e. Postman.
- Worked closely with Product Managers and Development teams to prioritize testing efforts and ensure on-time delivery.

Woffu   **2019-2020**
Senior QA Engineer testing a time-management app for companies
- As the **first SDET hire**, implemented the automated testing framework from scratch, based on **Protractor**(Js) for the client interface and **Postman** for the API.
- **Trained the manual QA peers** so they could start contributing to the automation efforts.
- Contributed to testing the **native mobile applications**.
- Supported Customer Success team in production issues triage.
- Drove the adoption of the main scrum practices and ceremonies, promoting a shift-left approach to testing.

Ogun   **2018-2019**
Senior QA Engineer, building an ERP for the construction industry
- Had the opportunity to participate in a new venture **from incubating stage to production launch.**
- As the first QA hire, I evolved the automated testing effort from a PoC to an actual framework, covering frontend e2e with **Protractor** and API with **Postman**, creating the different testing suites (regression, release etc).
- Was the only QA contributor for the 4 squads that composed the Tech team.

Aktios   **2015-2018**
Test Automation Engineer, building an ERP/Accounting platform

- Designing and implementing test automation solutions for .NET + Angular-based products. I used **Postman** for API/Business logic testing and **Protractor** to automate the UI suite.

Nextret , Quality Analyst	**2014-2015**
Sogeti, Junior Quality Analyst	**2012-2014**
Picis, QA intern	**2011-2012**

EDUCATION

UPC, **Telecommunications Engineer**	2012
BCN Code School, **React.js Bootcamp**	2020
BCN Code School, **Javascript Bootcamp**	2020
