Software Development Engineer in Test (SDET) with 15 years of experience in QA and test automation.

Proven track record of building test automation frameworks from scratch and leading quality strategy in fast-paced agile environments. Proficient in TypeScript, Playwright, Cucumber, Postman, and CI/CD pipelines.

EXPERIENCE

Between Technology 11/2024 - 05/2025 Senior SDET (temporary role)

- Joined a team for six months dedicated to a major client, to automate the regression test suite of a long-running project
- Built a new automation project from scratch using Playwright, setting up the pipeline to run tests on demand and nightly. My contribution shortened time-to-production by 2 weeks.

Combination A/B 06/2022 - 11/2024 Senior SDET

- Led test automation efforts for a legacy project lacking any testing, increasing test coverage and promoting best practices.
- Developed and maintained automated test frameworks using Cucumber, Playwright, and NUnit, covering unit to end-to-end layers.

Alten Spain 2021-2022 Senior SDET

- Embedded in an insurance industry client.
- Implemented testing for a business intelligence tool, which included data ingestion, data pipelines, dataset transformation, and visualization.
- Tested Azure data pipelines with custom scripts and business logic with Cucumber.
- Assisted in production releases to perform smoke testing and troubleshooting

Cotecna 2020-2021 Senior QA Engineer

- Introduced a holistic approach to quality, implementing practices like "3 amigos" meetings and being actively involved in refinement sessions.
- Designed and facilitated testing workshops for other QA peers on topics such as Postman.
- Worked closely with Product Managers and Development teams to prioritize testing efforts and ensure on-time delivery.

Woffu 2019-2020 Senior QA Engineer testing a time-management app for companies

- As the first SDET hire, implemented an automated testing framework from scratch based on Protractor (JS) for the client interface and Postman for the API.
- Trained manual QA peers to contribute to the automation efforts.
- Contributed to testing native mobile applications.
- Supported the Customer Success team with production issue triage.
- Drove the adoption of key scrum practices and ceremonies, promoting a shift-left approach to testing.

Ogun 2018-2019 Senior QA Engineer, building an ERP for the construction industry

- Participated in a new venture from the incubating stage to production launch.
- As the first QA hire, evolved the automated testing effort from a proof-of-concept to a full framework, covering frontend E2E with Protractor and API with Postman.
- Was the sole QA contributor for four development squads.

Aktios 2015-2018 Test Automation Engineer, building an ERP/Accounting platform

- Designed and implemented test automation solutions for .NET and Angular-based products.
- Used Postman for API/Business logic testing and Protractor to automate the UI suite.

Nextret, Quality Analyst 2014-2015

Sogeti, Junior Quality Analyst 2012-2014

Picis, QA intern 2011-2012

EDUCATION

UPC, Telecommunications Engineer, 2012

BCN Code School, React.js Bootcamp, 2020

BCN Code School, Javascript Bootcamp, 2020

LANGUAGES

- Spanish - Native C2
- English - B2
- Catalan - Native C2

KEY SKILLS

Test Automation: Playwright, Cucumber, NUnit, Postman, Protractor

Programming Languages: JavaScript, TypeScript, Python

Methodologies: Agile, Scrum, CI/CD

Tools: Azure Data Pipelines, PowerBI, GitHub Actions, BitBucket Pipelines

Testing Types: End-to-End (E2E), API, UI, Mobile, Regression, Smoke
